All West Virginia high school juniors, except those taking the alternate assessment, will be taking the SAT® School Day Test, provided by the College Board as a statewide high school assessment.¹ By using an established college entrance exam to test students' knowledge of West Virginia College and Career Readiness standards, the West Virginia Department of Education is reducing the number of tests being administered for those students who intend to apply or might apply for college.

Prior to test day, all students will fill out the first section of the answer sheet during a class session with the assistance of a test supervisor. The section contains some questions that must be answered and others that are optional.

Students are required to provide the following information on the SAT answer sheet prior to taking the test:

- first and last name (question #1);
- school (#2);
- school code (#3);
- date of birth (#5);
- grade level (#12),
- sex (#15) and
- student identifier number (WVEIS number) (#23).

Students will also be asked to complete their optional four free score sends. This allows College Board to send a student's scores to the colleges or scholarship programs identified by the student. If left blank, no scores will be sent.

The other questions are optional and voluntary. You, as a parent or guardian of a student under the age of 18, must give written consent **on this form by circling YES** for eight individual questions, and you may give blanket consent to the 23 remaining questions **by circling YES** if you want your student to answer them.

Students 18 years or older must give their own written consent **on this form in order** to answer the optional questions. They do not need parental consent to answer the optional questions, but they may wish to review this form with a parent or other adult for guidance.

Below is a table on which each row lists an optional question (for a total of four questions) the question number, the reason why the College Board requests the information and an
