

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER
Monitoring Reporting Requirements Not Met for
JOHN J CORNWELL SCHOOL **WV9914014**

Our water system violated drinking water monitoring requirements within the past year. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time

What should I do?

At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, how often we are supposed to sample for these contaminants, other violations, and the associated compliance period.

Monitoring Violation	Year-Fed Report #	Monitoring Frequency	Compliance Period
03, TOTAL ARSENIC, Results Not Reported as Required	2020-10731 2020-10584	Quarterly	2 QT 2020 4 QT 2019
27, CHLORINE, Results Not Reported with Coliform Sample	2020-313427	Quarterly	2 QT 2020
27, HALOACETIC ACIDS, Results Not Reported as Required	2020-10736	Quarterly	2 QT 2020
27, TRIHALOMETHANES, Results Not Reported as Required	2020-10732	Quarterly	2 QT 2020
3A, E COLI, Valid Compliance Coliform Sample(s) Not Reported	2020-313428	Quarterly	2 QT 2020

What happened? What is being done? (Describe corrective action)

The chief water operator resigned at the end of March 2020. Schools were closed on 3/13/2020 due to COVID-19. We were unaware that the sampling was still required to be performed. We have since retained the services of a properly certified Chief operator. The required sampling has been conducted and the results have been submitted to the state. All results were within acceptable limits & the water is meeting the current standards.
